\$1SAP Details

- ✓ Token Name: Solverified Audit Protocol Token
- ✓ Symbol: 1SAP
- ✓ Network: Polygon
- ✓ Type: ERC20
- ✓ Decimals: 9
- ✓ T Supply: 10,000,000,000,000,000 (10 QD)
- ✓ M.Supply: 10,000,000,000,000,000 (10 QD)
- ⓘ Circulating Supply: 1,00,000,000,000,000 (1% - 100T)
- ⓘ Burn Allocations: 9,900,000,000,000,000 (99% - 9.9 QD)
- ⓘ Market Cap: \$ (To be announced)
- ⓘ Current Price: \$0.00 (To be announced)
- ✓ Contract Verified
- ⓘ Ownership Renounced (To be announced)
- ⓘ Locked LP (To be announced)
- ⓘ Except 0.00024% for Airdrops, all the rest are locked from 2 to 10 years

\$1SAP, Only 1% Will Be Alive!

2 year strategic burning program

Burning events are designed in a way to bullish and gradually stabilize the value of 1SAP tokens in the first 3 to 24 months of its launch. This helps in reaching the right market value and to make it's position on the top. There will be a manual removal of 99% (9,900,000,000,000,000 \$1SAPs) of 1SAP's total supply; a 60% in the first phase(Q4 2022) and the rest vested 39% gradually within a period of 24 months from launch. We may withdraw the auto burning function in future, but not definitely till 2025.

Reflections

How Reflections work

1SAP is a deflationary, reflection token deployed on the Polygon network, allows users to earn a passive income simply by holding 1SAP.

Invest & HODL

2% of every transaction is automatically redistributed to all existing 1SAP holders as a passive income, based on the number of tokens held by them.

Auto Fire

To decrease the circulating supply along with time and increase the price of 1SAP, contract is ensuring to burn a small share of every transaction by transferring tokens to the dead wallet.

Stabilizing Price

On every transaction a certain percentage is transformed into liquidity for Quickswap. It's automatic and helps create a stable price floor.

Marketing, R&D

To ensure professional and wide marketing and researches are live always, certain percentage of each transaction will be contributed to the 1SAP development wallet.

The Economics Behind

Tokenomics designed by experienced Financial Experts & Analysts

1SAPs are LOCKED

99% of Total Supply will be burned. 55% from the rest 1% of TS is locked, 45% into liquidity

**\$1SAP is a Rug-Proof ERC20
token on the Polygon Network.**

LP will be burned!

Team will ensure the LP token burns, liquidity locks, other vestings, etc. Interests of our users is our priority. The details will be updated here ASAP.

Projects Under R&D

Solverified projects are under researches and on initial development stage. We are working hard for the defi users to provide a more secure and affordable infrastructure.

Solverified Audit & Project Analysis

Solverified offers premium services like deep technical audit of smart contracts and project analysis. At present, we provide Quick Contract Audit, Fundamental Analysis & Core Audit on affordable cost.

Solverified Audit Protocol

Solverified Audit Protocol and its use cases will enhance the blockchain/ decentralized user experience and provide them the opportunity to meet automated security applications. Protocol will be live and start implementing projects by Q3 2023

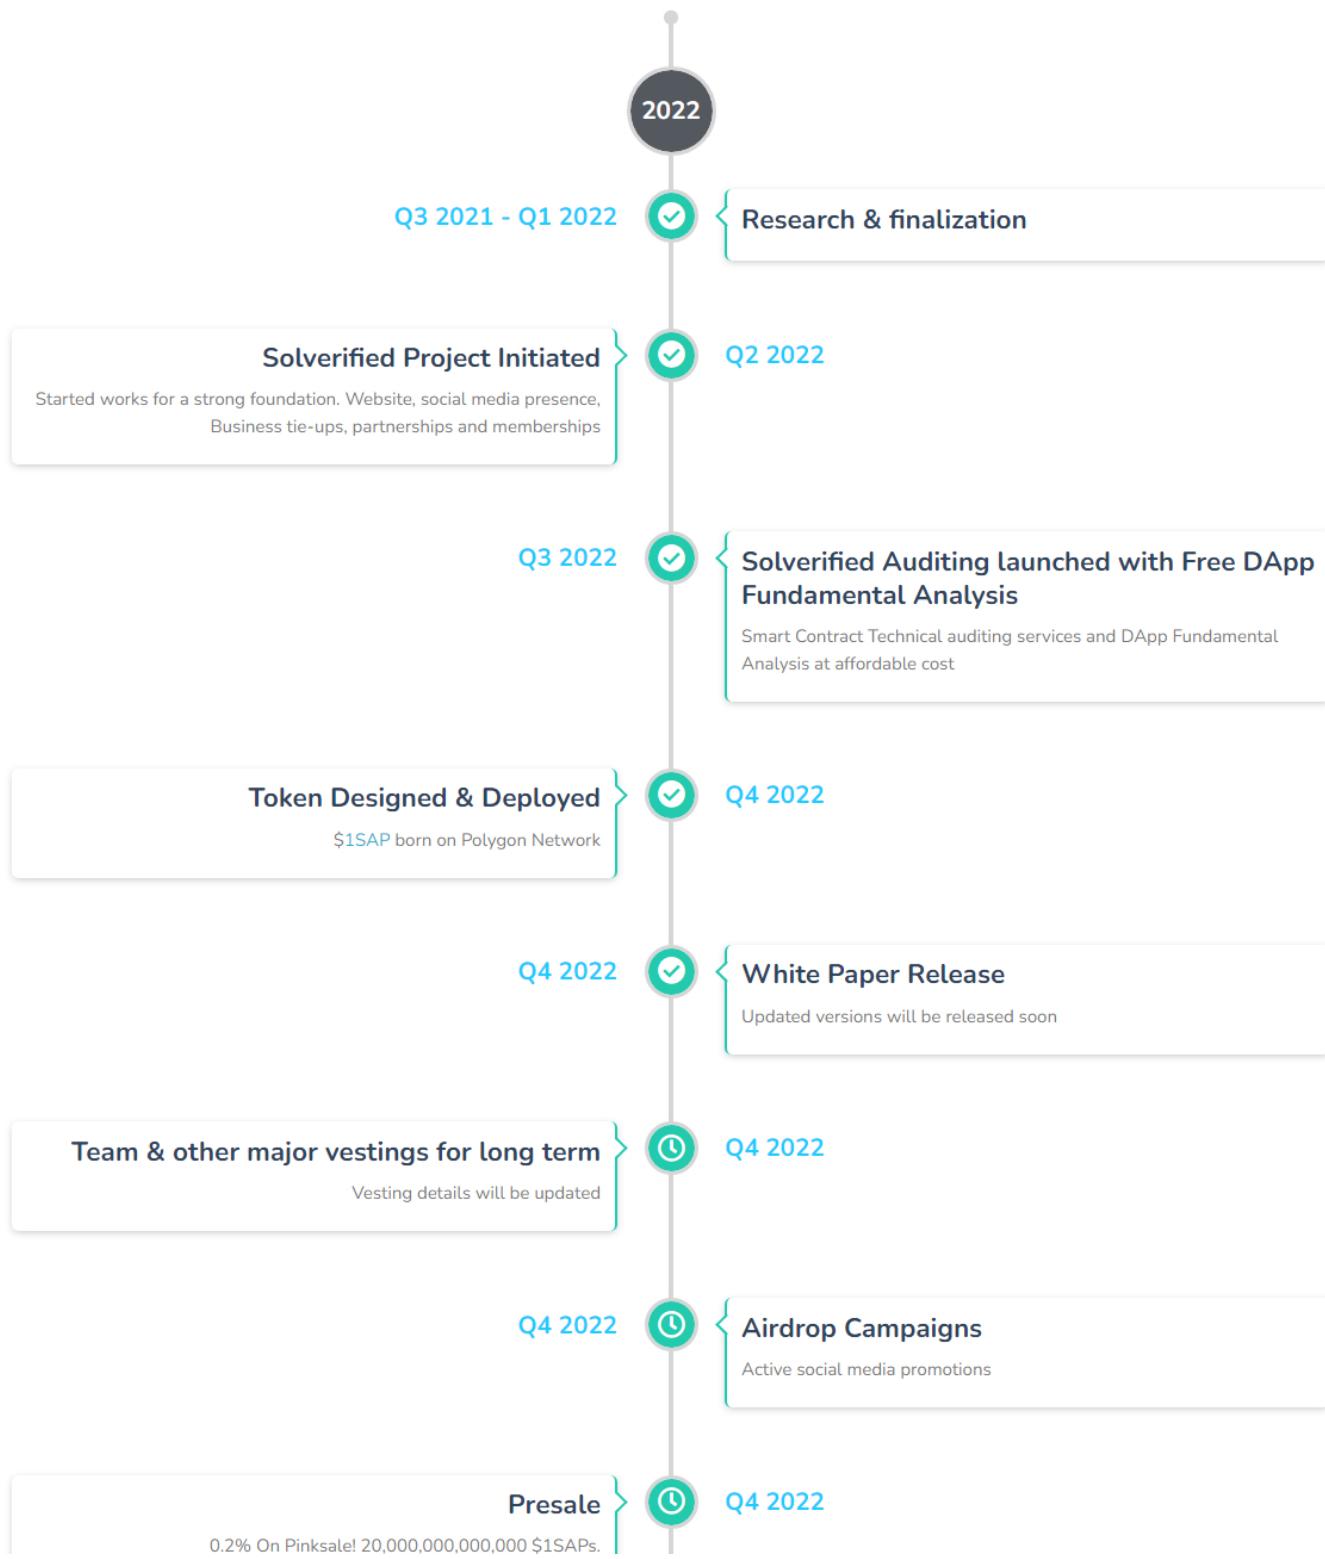

Token Vesting & Management

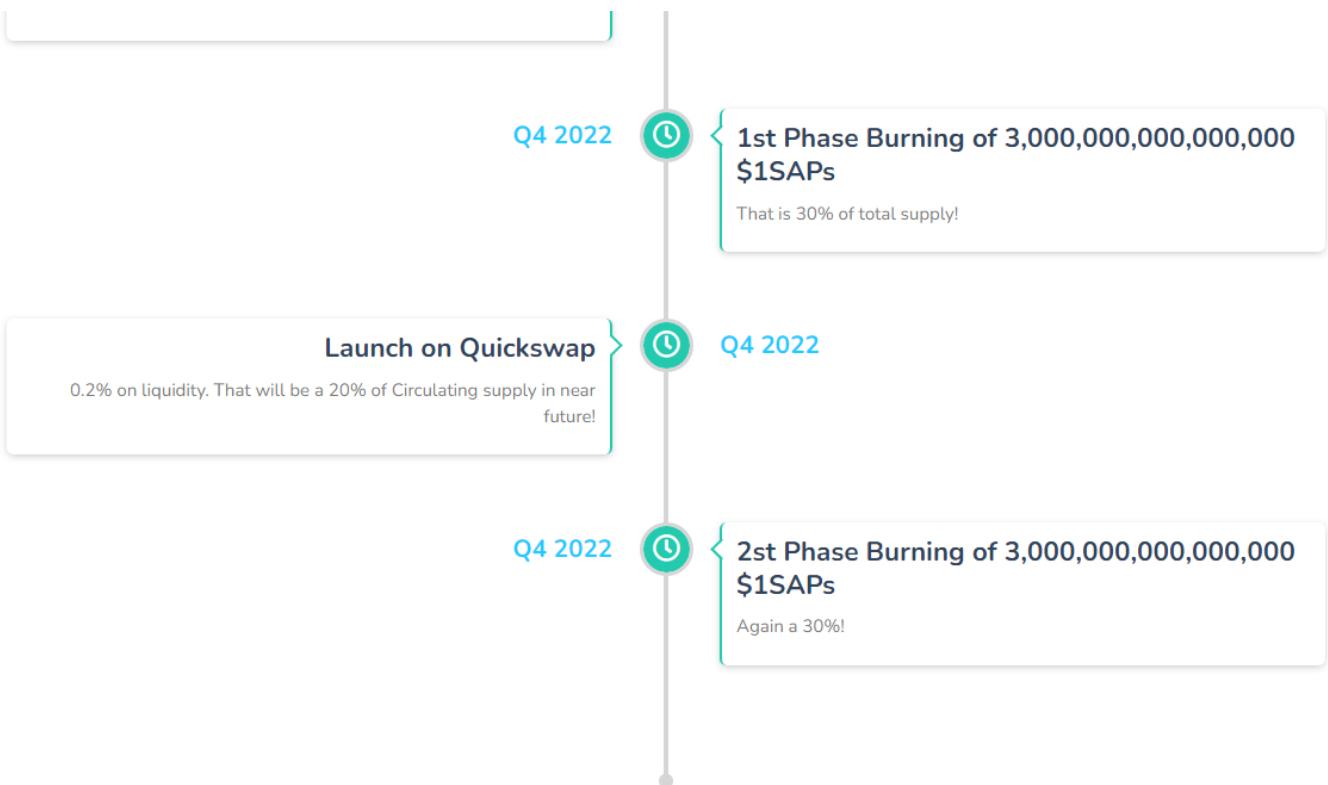

Affordable Token Vesting Management Platform to ensure users to secure distribution and management of their tokens

The Roadmap

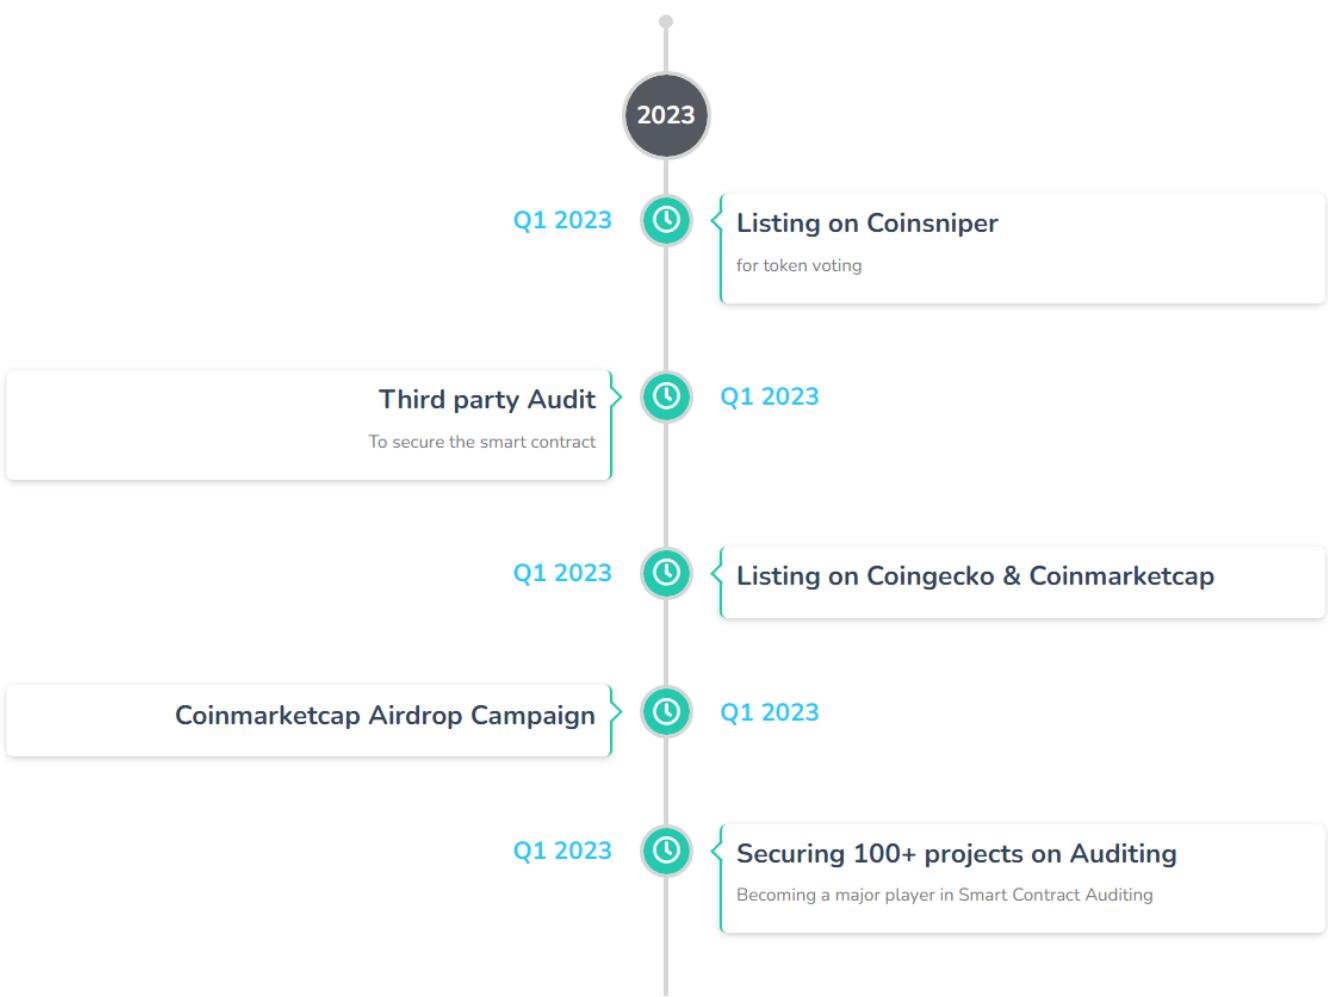

Please note, there will be updates on the plans on time, and will be updated here.

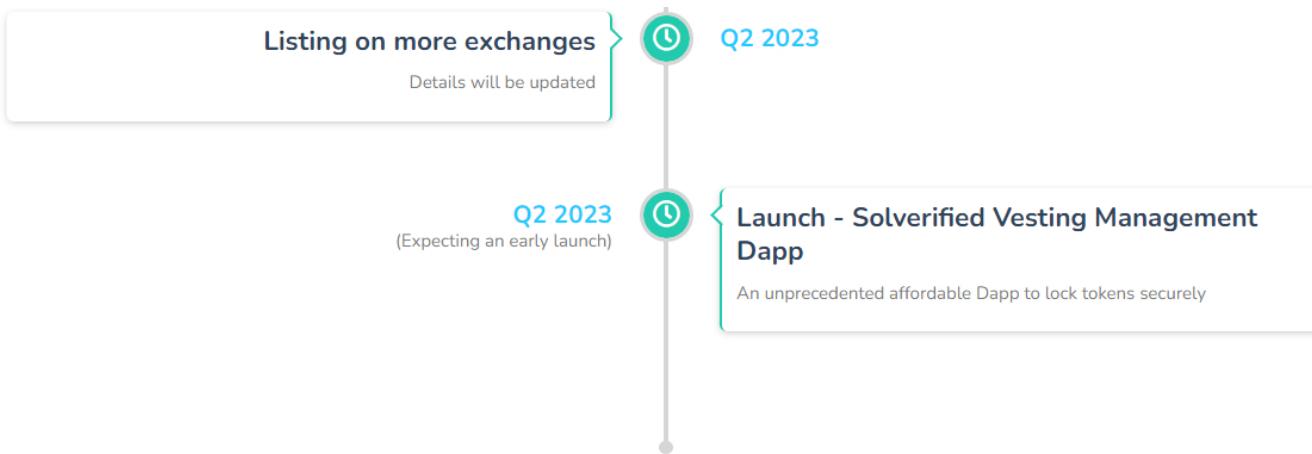

PHASE I

PHASE II

PHASE III (Announcing soon)

We have restrictions to release detail doc on the Solverified Audit Protocol at this early stage. Phase III will be completely focusing on the development and launch of the protocol and related dapps to enhance the user experience in smart contract auditing and blockchain security.

How to buy \$1SAP without confusion

1. Download & setup MetaMask

Download [MetaMask](#) (a crypto wallet in form of a browser extension). After that, you will have to add the Polygon Chain to your network list. ([Click here](#) for a step-by-step tutorial)

2. Buy and send MATIC to MetaMask

Buy MATIC on an exchange (i.e. Binance, Kraken, Coinbase etc.). Transfer the tokens to your MetaMask wallet address. ERC-20 addresses start with a "0x"

3. Head on to QuickSwap and swap for \$1SAP

[Click here](#) to head on over to Quickswap or use this address (Address Will Be Updated Here After Swap Ends) to select 1SAP. Set the slippage tolerance to 15% (sometimes it may be a bit more, depending on how much demand there is)

4. See your \$1SAP, HODL & earn your profits !

Swap MATIC for 1SAP. Now you need to add 1SAP to your MetaMask (Tutorial will be updated) to view your \$1SAP. Lastly HODL!
